OBJECTIVE

Seeking to join a progressive organization where I can apply my skills in web development and to create engaging and accessible websites while gaining hands on experience and advancing my career.

TECHNICAL SKILLS

FRONTEND HTML5 CSS3 Bootstrap JavaScript

BACKEND python Django

DATABASE MySQL

PROJECTS

TODO – LIST

- This project involves creating a simple to-do list application using the Django web framework. Users can add small tasks, view their list of tasks, and delete tasks as needed. The app will store user tasks in a MySQL database to keep data persistent across sessions

BANKING WEBSITE

- To create a console level banking website using python and getting some input from user to create account and add some functionality like create account, check balance and withdraw

BLOG WEBSITE (FULL STACK)

- This website involves user authentication with signup and login forms, as well as authorization to collect any blogs and comments under those blog I use html css and Django for user interface and mysql for save user data.
